

"Assisting Churches in Reaching Children"

October 2020

Dear Friends,

Normally I would be sharing a schedule of classes to pray for and recounting the summer's activities, but normal and 2020 do not seem to go together. While I did have some Junior Church opportunities this summer, and even had a chance to preach once, most of my summer activity was in the form of recorded videos. I also traveled to schools to request that they pass out permission slips, which most agreed to do, however I did not give them a schedule for classes yet. This is because we do not plan to have in person Released Time Bible Classes until January. Our hope is that by then normal will be, well, more normal.

So now I am trying to collect information on permission slips in order to try to connect to the students through our RBMkids.org website. I am finding that even collecting the information is a slower process than I expected. Right now it looks like my first video will be posted mid to late October. Please pray for me as I have decisions to make on what to include in these videos and how many I should do to cover each month. I am thinking that I will have at least two, one with a puppet, the verse and the theme for the month and one with a short lesson. Of course we hope, as previously mentioned, to be able to once again have in person classes starting in January.

Now for what is normal. God has not changed; His mercies are new every morning! The church, the body of Christ, is still the church. We are still trying to reach children for Christ. Your faithfulness is still what makes this ministry possible. I have visited several churches since they opened up and found much to be encouraged about. In fact, most of the time the closest that I have been able to feel that things are somewhat normal is in church. It has been wonderful to sing praises to our God and listen to His Word and just be a part of God's family.

Thank you for all you do. God bless you. Keep safe.

In Christ's service,

Dave and Wendy
