## Preparing for consolidation

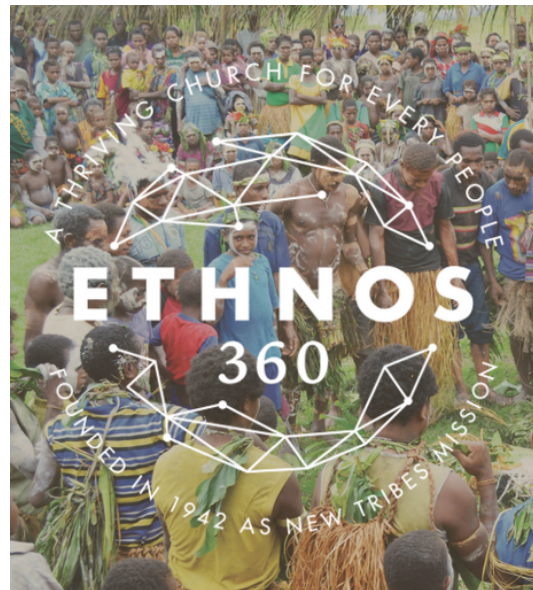

In our last update, we asked you to be praying about the timing of our transition to Ethnos360 Bible Institute [EBI] in Wisconsin. Even though most of our coworkers are moving this summer, leadership has encouraged us to take a full year of "Ministry Partnership Development [MPD]," delaying our move to Summer 2021. They would like us to reach at least 70% of the mission's recommended support level before starting at the other location. This date also gives EBI time to acquire more staff housing, and our older daughter time to complete high school in Michigan. We have not done full-time MPD since 2002; please pray we would find creative ways to connect with people during this season of coronavirus concerns! If you would like to know more specifics about how to pray for us in the year ahead, or about how a "recommended support level" works, feel free to email us with questions.

## Kaje Baptisms

Taylor and Abby Goheen, graduates of EBI Jackson, now minister among the Kaje people of Papua New Guinea. "I know these past days and months have been a time of mixed emotions, heartache, frustration and confusion for many of us around the world, but perhaps this short video

can be the cause of much rejoicing. . . Pray that this group of newly baptized believers will continue to live in light of the fact that Jesus is both the Lord and the Christ.” [Check out the video.](#)
