

A cordial greeting from Marcala, Honduras, on this end of the year.

As the end of this year comes, we are happy for all the goals we achieved because of the grace of the Lord. As family, we are really thankful with God because our daughters finished another school year. In this month of December the twins where sharing with kids about God in a community named Chocuara. It was a beautiful experience for them.

We have been supporting the biblical institutes, forming liders on some zones. Olga has been working in the woman's ministry with other sisters in Christ. We are discipling leaders for them to teach other women from their communities. They are also working on the 2024 conference that is going to be in March in La Esperanza.

We are making exploration trips to the south of the country (Choluteca and Valle). We are making contacts to implement projects of evangelization and planting churches.

We want to thank God and all of you for being faithful and being supportive. Thanks to that we got to complete the work of God. Without that team work we wouldn't be able get done the work of the Lord and the goals that we had. We can now say EBENEZER (God help us until here).

Reasons for Prayers:

- 1. We wanted to pray for the projects we want to do on the south of Honduras for this coming 2024. We have many expectations and goals. The goal is to establish a central part from which we can move to other places.**
- 2. We want to pray for family support, requesting the studies for our daughter this next year.**
- 3. We want to pray for financial support for the mobilization and projects on the places that we are going to be working.**

The Cantarero family wishes you a Blessed 2024.

Isaias and family
